Origins and Context of the Middle Passage

The middle passage refers to the transoceanic segment of the triangular trade route in which enslaved Africans were forcibly transported from the African continent to the Americas. This passage was a

central component of the larger transatlantic slave trade, which began in the 15th century and continued until the 19th century. European powers, including Portugal, Spain, Britain, France, and the Netherlands, established coastal forts and trading posts in Africa to facilitate the capture and sale of enslaved Africans. These captives were often prisoners of war, victims of raids, or individuals kidnapped during violent incursions.

In the context of AP World History, the middle passage is studied as part of the broader patterns of global interaction and economic exchange during the early modern period. The triangular trade linked Europe, Africa, and the Americas in a complex system: European goods were traded for African slaves, who were then sent to the Americas, where their forced labor produced commodities such as sugar, tobacco, and cotton that were shipped back to Europe. This system was driven by the demand for cheap labor in the New World plantations and the pursuit of profit by European merchants and colonists.

Triangular Trade System

The middle passage was the second leg of the triangular trade:

- **First leg:** European manufactured goods (e.g., guns, textiles, alcohol) were shipped to Africa.
- **Second leg (Middle Passage):** Enslaved Africans were transported across the Atlantic to the Americas under brutal conditions.
- **Third leg:** Raw materials produced by slave labor in the Americas were sent to Europe.

This trade system fueled economic growth in Europe but caused profound human suffering and demographic changes in Africa and the Americas.

Conditions and Experiences During the Middle Passage

The middle passage is notorious for the horrific conditions enslaved Africans endured during the voyage. Ships were overcrowded, with little regard for human dignity or health. Men, women, and children were packed tightly below decks, often shackled together in uns
