## Origins of the Moral Majority

The moral majority us history definition begins with its formation in 1979 by Reverend Jerry Falwell, a prominent evangelical Christian leader. The movement emerged as a response to the growing secularism and liberal social changes occurring in the United States during the 1960s and 1970s. Key issues such as the legalization of abortion following the Roe v. Wade decision in 1973, the sexual revolution, and the rise of feminist and gay rights movements fueled concerns among conservative Christians. The moral majority sought to counter these trends by encouraging political activism among evangelical Protestants and conservative Catholics. The organization aimed to restore traditional Christian values in American public life and to influence government policies accordingly.

## Historical Context
