The ARE tests candidates on their competency in various aspects of architecture, including design, construction, and project management. Passing the ARE is a mandatory step for registration as a licensed architect and is recognized by all U.S. licensing jurisdictions. The exam ensures that candidates meet the professional standards necessary for independent practice.

Structure and Content of the Exam

The NCARB ARE is divided into multiple divisions, each focusing on distinct areas of architectural practice. As of the most recent version, ARE 5.0, the exam consists of six divisions:

- Practice Management

- Project Development & Documentation
- Construction & Evaluation

Each division tests specific competencies through a variety of question types, including multiple-choice, case studies, and graphic vignette questions. The exam emphasizes real-world scenarios to evaluate a candidate's ability to apply architectural knowledge effectively.
