3. Puzzles and Riddles

Puzzles and riddles are an interactive way for kids to engage with mysteries. They can be word puzzles, logic games, or visual challenges. Here are some examples:

- Logic Puzzles: Present scenarios where kids must use deductive reasoning to solve a problem. For example, "Three friends, Alex, Ben, and Charlie, each have a pet: a dog, a cat, and a bird. Alex doesn't have a dog. Ben doesn't have a cat. Who has which pet?"
- Word Riddles: Riddles can be a fun way to exercise creativity and lateral thinking. An example: "I speak without a mouth and hear without ears. I have no body, but I come alive with the wind. What am I?" (Answer: An echo.)
- Mystery Boxes: Create a mystery box filled with various items. Kids must use clues to guess what items are inside without looking.

These activities encourage teamwork and imaginative thinking, making them perfect for group settings like classrooms or family gatherings.
