Understanding Bequests in Nonprofits

Bequests are a form of planned giving where donors leave assets to a nonprofit organization through their will or estate plan. These gifts can include cash, securities, real estate, or other valuable property. Nonprofit accounting for bequests begins with understanding the nature and conditions of the bequest, as these factors influence how the gift is recognized and managed.

Types of Bequests

Bequests can vary widely depending on the donor's intentions and the terms of the estate. Common types include:

- **Specific Bequests:** A designated asset or amount of money left to the nonprofit.
- **Residuary Bequests:** A portion or the remainder of the estate after other distributions.

- **Contingent Bequests:** Gifts that take effect only if certain conditions are met, such as the death of a beneficiary.

Importance of Bequests for Nonprofits

Bequests provide nonprofits with long-term financial stability and the ability to fund significant projects or endowments. Given their often substantial value, nonprofits must apply rigorous accounting standards to ensure these gifts are properly recorded and utilized in alignment with donor intent.

Accounting Principles for Bequests

Sound nonprofit accounting for bequests involves adherence to generally accepted accounting principles (GAAP) and standards specific to nonprofit entities. These principles guide the recognition, measurement, and disclosure of bequest income.

Recognition of Bequests

Bequests are typically recognized as revenue when the nonprofit has received notification of the bequest and can reasonably estimate the value of the gift. This often occurs upon notification of the donor's death or when the estate is settled. Until then, bequests may be classified as contingent assets, subject to uncertainty.

Valuation of Bequests

Accurate valuation is essential in nonprofit accounting for bequests. The value depends on the type of asset received:

- Cash and marketable securities are recorded at fair market value on the date of receipt.
- Real estate and other non-cash assets require professional appraisal to determine fair value.
- Non-liquid assets might be discounted or adjusted for sale costs.

Recording and Reporting Bequests

Proper recording and transparent reporting of bequests are fundamental responsibilities in nonprofit accounting for bequests. This ensures accountability to donors, board members, and regulatory agencies.

Journal Entries for Bequests

When a bequest is received, the following accounting entries are commonly made:

1. Debit the asset account (e.g., Cash, Investments, Property) at the fair value.
2. Credit contribution revenue or a dedicated temporarily or permanently restricted net asset account if donor restrictions apply.

Financial Statement Presentation

Bequests are presented as part of contribution revenue in the statement of activities. If the bequest carries donor-imposed restrictions, it is reported within temporarily or permanently restricted net assets until those restrictions are satisfied.

Disclosure Requirements

Nonprofits should disclose significant bequests in the notes to their financial statements. Disclosures typically include the nature of the bequest, estimated value, and any restrictions or contingencies.

Tax Implications of Bequests

Nonprofit accounting for bequests must also consider the tax implications for both the donor's estate and the receiving organization. Understanding these elements is critical to maximize the benefit of bequests.

Estate Tax Considerations

Bequests to qualified nonprofit organizations are generally exempt from federal estate tax. This exemption can encourage donors to leave charitable gifts in their wills, but nonprofits should work with estate attorneys to navigate these rules.

Unrelated Business Income Tax (UBIT)

If a bequest includes assets that generate unrelated business income, the nonprofit may be subject to UBIT. Proper accounting and reporting are necessary to comply with IRS regulations and avoid penalties.

Best Practices for Managing Bequests

Effective management of bequests enhances the nonprofit's ability to honor donor intent and maintain financial integrity. Implementing best practices in nonprofit accounting for bequests is essential for stewardship and operational success.

Developing Policies and Procedures

Nonprofits should establish clear policies for accepting, valuing, and managing bequests. These policies typically address:

- Criteria for acceptance of bequests
- Valuation methods for non-cash gifts
- Handling restrictions and contingencies
- Documentation and recordkeeping requirements

Collaboration with Legal and Financial Advisors

Coordination with estate planners, attorneys, and financial professionals ensures compliance with legal requirements and optimizes the financial impact of bequests. This collaboration supports accurate accounting and prudent asset management.

Transparent Communication and Reporting

Regular reporting to stakeholders about the receipt and use of bequests fosters donor confidence and supports fundraising efforts. Transparency in nonprofit accounting for bequests is a key factor in building long-term relationships with benefactors.

Frequently Asked Questions

What is a bequest in nonprofit accounting?

A bequest is a gift left to a nonprofit organization through a donor's will or estate plan, typically realized after the donor's death.

How should nonprofits recognize bequests in their financial statements?

Nonprofits should recognize bequests as revenue when the gift is both probable and measurable, generally upon notification of the donor's death and confirmation of the gift's value.

Are bequests considered restricted or unrestricted funds in nonprofit accounting?

Bequests can be either restricted or unrestricted depending on the donor's instructions; if the donor specifies a purpose, the funds are restricted, otherwise they are treated as unrestricted.

What accounting standards guide the reporting of bequests for nonprofits?

In the United States, nonprofits follow Accounting Standards Codification (ASC) 958, which provides guidance on revenue recognition, including bequests.

How should nonprofits handle bequests that are conditional or uncertain?

Conditional or uncertain bequests should not be recognized as revenue until the conditions are met or uncertainty is resolved to avoid overstating assets or income.

What are the tax implications for nonprofits receiving bequests?

Generally, bequests are tax-exempt for nonprofits; however, the organization must ensure proper reporting and compliance with IRS regulations to maintain tax-exempt status.

Can nonprofits invest bequest funds, and how should

this be accounted for?

Yes, nonprofits can invest bequest funds, especially if they are restricted for endowment purposes; investment income should be recorded separately and according to donor restrictions.

How do nonprofits disclose bequests in their annual reports?

Nonprofits typically disclose significant bequests in the notes to financial statements, including the nature, amount, and any restrictions associated with the gift.

What internal controls should nonprofits implement for managing bequests?

Nonprofits should have policies for documenting, valuing, and safeguarding bequest receipts, including segregation of duties, regular reconciliations, and donor intent tracking.
