## Understanding the GRE General Test

The GRE General Test assesses the skills that are critical for success in graduate school, including analytical writing, verbal reasoning, and quantitative reasoning. It is important to familiarize yourself with the test's components to tailor your study plan effectively.

## Test Structure

The GRE General Test comprises three main sections:

### 1. Analytical Writing:

- This section consists of two tasks: "Analyze an Issue" and "Analyze an Argument."
- Test-takers are given 30 minutes for each task.

### 2. Verbal Reasoning:

- The verbal section has two parts, each containing 20 questions.
- It assesses reading comprehension, critical reasoning, and vocabulary usage, with a total time of 60 minutes.

### 3. Quantitative Reasoning:

- Like the verbal section, this also consists of two parts with 20 questions each.
- It tests basic mathematical skills, understanding of quantitative concepts, and problem-solving abilities, also totaling 60 minutes.

The GRE is typically delivered in a computer-based format, although paper-based versions are available in some locations.

## Scoring System

The GRE General Test is scored on a scale of 130 to 170 for the verbal and quantitative sections, in one-point increments. The analytical writing section is scored from 0 to 6 in half-point increments.

- Verbal Reasoning: 130-170
- Quantitative Reasoning: 130-170
