Understanding each part's role helps in optimizing usage and maintaining the appliance's longevity. Below are some of the primary components featured in the diagram and their functions.

### Firebox and Cooking Chamber

The firebox is the heart of the Pit Boss KC Combo, where fuel combustion occurs. It is typically constructed from durable steel to withstand high temperatures and includes vents for airflow regulation. The cooking chamber, adjoining the firebox, contains the cooking grates and heat distribution systems that ensure even cooking.

## **Burners and Ignition System**

The burners provide the heat source, usually fueled by propane or natural gas, depending on the model. The ignition system, often electronic, allows for quick and reliable lighting of the burners.
