1. Chassis

The chassis is the outer casing of the Roomba i3. It is designed to protect the internal components from dust and damage.

- Maintenance: Regularly wipe down the chassis with a damp cloth to keep it clean. Avoid using strong chemicals that may damage the exterior finish.

2. Brush System

The brush system on the Roomba i3 includes a multi-surface rubber main brush and two side brushes.

- Function: The main brush is responsible for picking up dirt from carpets and hard floors, while the side brushes help sweep debris into the path of the main brush.
- Maintenance: Remove the brushes every few weeks to clear any hair or debris that may get tangled. Replace them every 6-12 months, depending on usage.

3. Wheels

The Roomba i3 features two main wheels and a front caster wheel.

- Function: The drive wheels allow the vacuum to move forward and backward, while the caster wheel helps with navigation and maneuverability.
- Maintenance: Inspect the wheels for obstructions and clean them regularly to ensure smooth movement.

4. Battery

The battery is crucial for powering the Roomba i3.

- Function: It provides the necessary energy for the vacuum to operate for up to 75 minutes on a single charge.
- Maintenance: Ensure the battery contacts are clean, and replace the battery every 1-2 years, depending on usage.

5. Dust Bin

The dust bin is where all the dirt and debris collected during cleaning are stored.

- Function: It is designed for easy removal and emptying.
- Maintenance: Empty the dust bin after each use and clean the filter every few weeks. Replace the filter every 2-3 months.

6. Sensors

Roomba i3 is equipped with multiple sensors.

- Function: These sensors help the vacuum navigate its environment, detect dirtier areas, and avoid obstacles and stairs.
- Maintenance: Clean the sensors with a soft, dry cloth to ensure accurate readings.

7. Charging Contacts

The charging contacts are located on the bottom of the Roomba i3.

- Function: They connect with the charging dock to recharge the battery when the vacuum is not in use.
- Maintenance: Ensure these contacts are clean and free of debris to maintain proper charging.

8. Motherboard

The motherboard is the central hub of the Roomba i3.
