Understanding the S-95 Certificate of Fitness

The S-95 Certificate of Fitness is a mandatory qualification for individuals responsible for the operation, handling, and storage of liquefied petroleum gases in New York City. This certificate is issued by the New York City Fire Department (FDNY) and is designed to ensure safety and compliance with local fire codes and regulations. Applicants must demonstrate a thorough understanding of LPG hazards, emergency procedures, and proper handling techniques.

Who Needs the S-95 Certificate of Fitness?

The S-95 certificate is required for personnel who oversee or manage LPG systems, including those in commercial kitchens, industrial settings, and other facilities where LPG is used or stored. This includes but is not limited to:

- Facility managers responsible for LPG equipment
- Technicians who install or maintain LPG systems
- Operators who use LPG for heating, cooking, or industrial processes

Possessing this certificate demonstrates a commitment to safety and regulatory adherence, reducing the risk of accidents and legal penalties.

Structure and Content of the S-95 Exam

The S-95 certificate of fitness practice test mirrors the format and content of the official FDNY examination. Understanding the structure of the exam is crucial for effective preparation. The test typically consists of multiple-choice questions designed to assess knowledge of LPG safety and regulations.

Exam Format and Duration

The S-95 exam is a written test administered at designated FDNY testing centers. Candidates are given a set amount of time, usually around 90 minutes, to complete approximately 40 to 50 questions. The questions focus on practical scenarios and safety protocols related to LPG handling.

Passing Criteria

To successfully obtain the S-95 Certificate of Fitness, candidates must achieve a passing score, typically around 70% or higher. The use of practice tests helps familiarize applicants with the question style and time constraints, improving the likelihood of passing on the first attempt.
