1. Invest in different asset classes (stocks, bonds, real estate)
2. Include domestic and international investments
3. Vary investment styles (growth, value, income)
4. Adjust portfolio periodically based on market conditions
5. Utilize alternative investments to enhance diversification

Performance Measurement and Evaluation

Key Performance Indicators

Common metrics include total return, risk-adjusted return, alpha, beta, and the Sharpe ratio. These indicators help managers compare portfolio results against benchmarks and peers.
