Origins of Greek Civilization

The Minoan and Mycenaean Cultures

The roots of Greek civilization can be traced back to the Aegean Bronze Age, characterized by two major cultures:

1. Minoan Civilization (circa 2600-1400 BCE)
 - Centered on the island of Crete.
 - Known for its advanced architecture, including the Palace of Knossos.
 - Engaged in trade across the Mediterranean.
2. Mycenaean Civilization (circa 1600-1100 BCE)
 - Located on mainland Greece.
 - Known for its fortified cities and Linear B script.
 - Played a crucial role in the development of Greek mythology and epics, notably the works attributed to Homer.

The Dark Ages

Following the collapse of the Mycenaean civilization around 1100 BCE, Greece entered a period known as the Dark Ages, marked by:

- A decline in population and literacy.
- The loss of architectural and artistic achievements.
- The eventual emergence of city-states or poleis around the 8th century BCE.

Archaic and Classical Greece

Rise of City-States

The 8th century BCE saw the rise of city-states, including:

- Athens: Known for its democratic system and cultural achievements.
- Sparta: A militaristic society famous for its rigorous training and discipline.

Each city-state had its own government, culture, and military strength, leading to both cooperation and conflict.

The Persian Wars

These wars fostered unity among the Greek city-states, leading to the formation of the Delian League.

The Golden Age of Athens

Following the Persian Wars, Athens entered a period of cultural and political flourishing, often referred to as the Golden Age (circa 480-404 BCE). Key aspects included:

- The development of democracy under leaders like Pericles.
- Flourishing arts, including the works of playwrights such as Sophocles and playwrights like Aeschylus.
