The **Rubaiyat of Omar Khayyam** is a collection of quatrains (four-line poems) attributed to the Persian mathematician, astronomer, and poet Omar Khayyam, who lived during the 11th century. However, it is the English translation by Edward FitzGerald, published in 1859, that gained worldwide acclaim and significantly shaped the Western perception of Persian literature. FitzGerald's translation is not merely a direct conversion of Khayyam's verses; it is a creative interpretation that captures the essence of Khayyam's thoughts on life, love, and the fleeting nature of existence.

## Omar Khayyam: The Man Behind the Poems

Omar Khayyam was born in Nishapur, Iran, around 1048 AD. He was a polymath—his contributions spanned mathematics, astronomy, and poetry. Here are some key points about his life and work:

- **Astronomy:** He played a significant role in reforming the Persian calendar, creating a solar calendar that was more accurate than the Julian calendar used in Europe.
- **Poetry:** Despite his accomplishments in science, Khayyam's poetic genius is what has immortalized him, particularly through the Rubaiyat.

## The Rubaiyat: Structure and Themes

The Rubaiyat consists of quatrains, each typically following an AABA rhyme scheme. The poems address universal themes that resonate with readers across cultures and centuries. Some prevalent themes within the Rubaiyat include:
