Historical Background of Sadako Sasaki

The story of **sadako and the thousand paper cranes** is deeply rooted in the historical events of World War II, particularly the atomic bombing of Hiroshima on August 6, 1945. Sadako Sasaki was only two years old when the bomb was dropped approximately one mile from her home. Although she initially survived the blast, the radiation exposure led to her developing leukemia ten years later. This section explores the historical context surrounding Sadako's life, the effects of the atomic bomb on Hiroshima's population, and the medical challenges faced by survivors.

The Atomic Bombing of Hiroshima

The bombing of Hiroshima was one of the most devastating events in modern history, resulting in massive casualties and long-term radiation effects. The bomb instantly killed tens of thousands of people, with many more suffering from injuries and radiation sickness in the following years. Survivors like Sadako faced severe health complications, including various forms of cancer caused by radiation exposure. Understanding this historical backdrop is essential to appreciating the significance of Sadako's story.

Sadako Sasaki's Early Life and Illness

Sadako was a lively and athletic child, excelling in running and school

activities. Her diagnosis of leukemia shocked her family and community
